

## Connecting to COCC's Terminal Server on a Mac

In order to connect to COCC's Terminal Server on a Mac, you will need to download Microsoft's Remote Desktop Application from Apple's App Store.

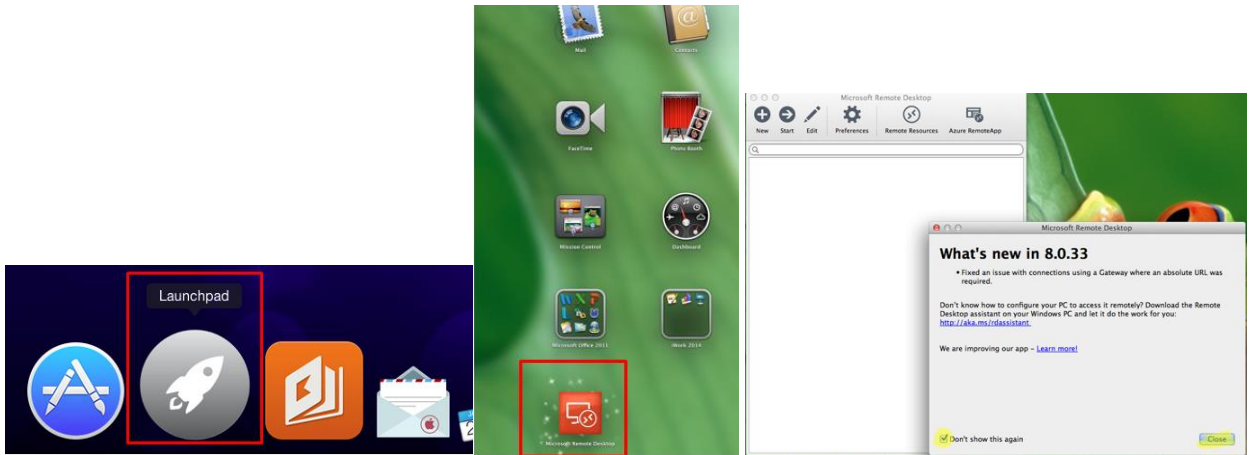

1. Launch the **App Store** on you Mac; in the search box, type **Microsoft Remote Desktop**

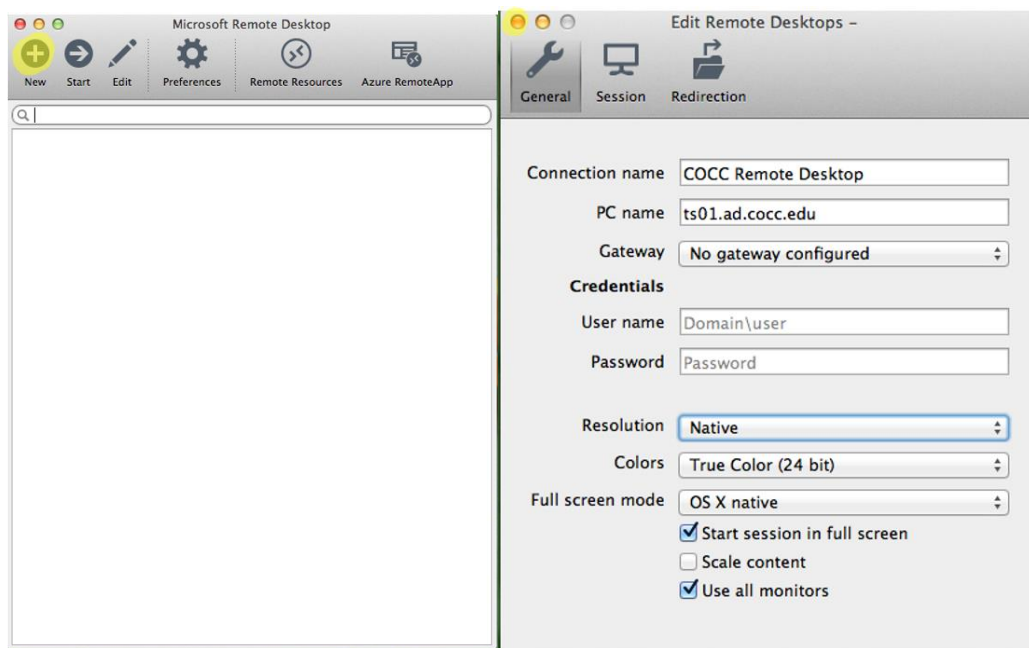

2. Select the **Microsoft Remote Desktop** application and click on **Get**, then click on **Install App** and wait for the application to download and install.

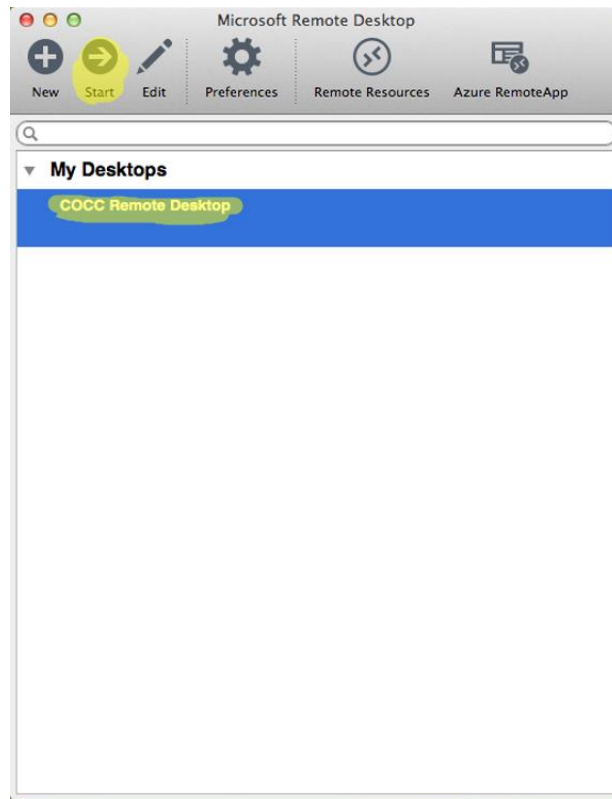

3. Once the Microsoft Remote Desktop application is installed, open the Launchpad by clicking on its Dock icon, find and click on the Microsoft Remote Desktop application to launch it. When the application launches, select the **“Don't show this again”** checkbox and click on **“Close”**

4. In the Microsoft Remote Desktop application, click on the **“+”** to add a New connection. In the Edit Remote Desktops window, fill in the connection information as shown below. When you finish entering the connection information, click on the **X** to close the Edit Remote Desktops window and save the connection.

5. In the **Microsoft Remote Desktop** app, under **My Desktops**, click on the connection that you just created to select it, then click on **Start** to open the connection.

6. When prompted, enter your username and password. Please make sure to type **ad\** before your username and click **OK**.
