SCM 101 Introduction to Supply Chain Management Outcomes

This is a hands-on, skills oriented course. Upon completion of this course, students should be able to:

1. Describe the primary differences between logistics and supply chain management.
2. Identify and describe the individual processes of supply chain management and their interrelationships within individual companies across the supply chain.
3. Demonstrate an understanding of the management components of supply chain management.
4. Describe and apply the basic tools and techniques useful in implementing supply chain management.
5. Identify the career opportunities in supply chain management.
